

Good Citizens Make Good Communities.

To learn more about  
the Real Work  
Computer Lab and  
how you may help,  
call: 225-3909

Claude and Leslie Gonzalez believe that the community has a responsibility to make sure all youth have ready access to today's technology.

So they did something about it.

Claude works with Georgia Communities In Schools. Leslie teaches a CIS class at Thomas County's Central Middle School. Frustrated with the lack of access these children had to computers and other high technology because of scheduling restraints, Leslie and Claude drafted a proposal for a "Real Work" computer lab and presented it to Flowers Industries. We are happy to support this project on an on-going basis. And we are happy to work with these hometown heroes who are making a difference in our community.
